

Hamilton Technology Request for Withdrawal
EPA I.D. No.: PAD 00 080 0680

JAN 20 1985

Henry J. Sokolowski, Chief
Facilities Management Section (3HW32)

Peter Schaul, Chief
RCRA Enforcement Section (3HW11)

As a result of Hamilton Technology's request for withdrawal of July 12, 1984, it appeared that Hamilton Technology was a protective filer never having stored waste for more than 90 days. Upon contacting the State (PA DER, Harrisburg Region) the situation at Hamilton was clarified. The storage area for which Hamilton was intending to be permitted never did accumulate hazardous waste for more than 90 days, however, the storage area on the original part A did accumulate hazardous waste for more than 90 days.

In order to properly handle Hamilton's withdrawal request, it is the State's responsibility to call-in the closure plan and ensure that the facility is properly closed. It is my understanding that your section will overview the State's activity to ensure that this facility will proceed through the closure process.
